SUMMARY

Backend engineer with 3 years of experience across high-scale consumer products and AI platforms. Led microservices decoupling, built LLM integrations, and owned backend services on a platform serving 10M+ monthly users at Wayground. Shipped a multi-agent AI system and a durable, checkpoint-based document ingestion pipeline end-to-end at Alltius. Core stack: Node.js, Python, distributed systems, and GenAI.

EXPERIENCE

Software Engineer II

August 2025 – May 2026

Alltius

Bengaluru

- Designed and built a multi-agent system using LangGraph from scratch, including tool-use agents, RAG pipeline, and prompt evaluation harness to validate output quality before shipping to production
- Rebuilt the document ingestion pipeline to support large S3 sources using durable workflow orchestration (Temporal) to handle failures, retries, and partial completions in long-running jobs.
- Added incremental ingestion and checkpoint-based retry to the S3 pipeline, so a failed mid-run job resumes from its last checkpoint rather than re ingest from scratch, critical for sources with hundreds of large files.
- Managed EKS deployments including on-premises deployment for a client, monitoring via ArgoCD and Datadog, and manual scaling during memory-intensive ingestion runs.
- Shipped front-end changes to the agent UI by driving Claude as a coding assistant, taking features across the stack despite a backend focus.

SDE-I

June 2023 – July 2025

Wayground

Bengaluru

- Owned the backend for the Comprehension question type -a nested question structure. Designed the MongoDB schema and built all CRUD APIs.
- Led monolithic-to-microservices decoupling initiative: extracted core business logic into standalone Node.js services with API versioning and service-to-service communication patterns.
- Shipped LLM-powered features to production (quiz generation, question enhancement, recommendations).
- Worked across the stack as needed: added Vue UI components and fixed a WebSocket issue on the client.

INTERNSHIPS

Backend Developer Intern

Jan 2022 - May 2022

Microsec Pvt. Ltd.

Remote

EDUCATION

Indian Institute of Information Technology (IIIT)

Una, Himachal Pradesh

Bachelor of Technology in Computer Science

August 2019 – May 2023

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL (PostgreSQL, MySQL)

Backend: Node.js, Express.js, FastAPI, Flask, Django, SQLAlchemy, Pydantic, Asyncio

AI / GenAI: LLMs, Langgraph, Langchain, OpenAI API, Vector stores / RAG, Multi-agent Orchestration, Prompt Engineering, Eval harness design

Databases & Cache: PostgreSQL, MongoDB, Redis, MySQL

Distributed Systems: Temporal, SQS, Microservices Architecture

DevOps & Cloud: AWS (EC2, EKS, S3, CloudWatch), Kubernetes, Docker, CI/CD, Prometheus
